INTRODUCTION

This Illustrated Parts Catalog is designed to provide simple but positive identification of replacement parts for the Piper Model PA-32-260, PA-32-300 and PA-32R-300 Cherokee, manufactured by the Piper Aircraft Corporation of Vero Beach, Florida

NOTE: UNDER NO CIRCUMSTANCES SHALL THIS CATALOG BE USED FOR RIGGING AND INSTALLATION PURPOSES

It is suggested that this catalog be thoroughly studied to determine its arrangement prior to its utilization

1 The catalog is divided into eleven (11) major sections described as follows:

a Section I to X inclusive contains all replacement parts for the complete airplane Each section is subdivided and each division includes an illustration and a parts listing

b Section XI is the Miscellaneous Group This group includes an illustration and parts list for the Placards and Exterior Stencils and a listing of the Optional Equipment Kits, Repair Kits and Special Tools

2 The following is a brief explanation of the columns in the parts listing:

a The "FIGURE AND INDEX" column indicates the illustration figure number and its part index number EXAMPLE: (2-1), the 2 is the figure number and the 1 is the index number The figure number appears only at the top of each parts listing page or at the beginning of each new parts listing

b The "PART NUMBER" column contains the identifying number of the replacement part and this number must be shown on all Parts Orders

c The "CODE" column is for the purpose of indicating special uses of the part An explanation of the letter code used is shown on the grid (page) preceding each parts listing and pertains to that listing only

ALL PARTS CODED WITH A "W" MUST BE PURCHASED FROM PIPER AIRCRAFT CORPORATION, LOCK HAVEN, PENNA

ALL PARTS NOT CODED WITH A "W" MUST BE PURCHASED FROM PIPER AIRCRAFT CORPORATION, VERO BEACH, FLORIDA

d The "NOMENCLATURE" column indicates the part name This name must be shown on all Parts Orders

e The "NO REQ" (Number required) column represents the total quantity of parts used per figure when the part is not indented and the quantity of parts used per assembly when the part is indented The symbor "AR" listed in this column means "As Required"

f The "SERIAL NUMBERS AFFECTED" column indicates the part application by airplane serial number

Indention Example: Indentions of listing in the "Nomenclature column" indicates "assemblies" and "components" or "parts", in order of their indentations

EXAMPLE

Figure and Index Number	Part Number	Code	NOMENCLATURE	No. Req.	SERIAL NUMBERS AFFECTED
			DOOR ASSEMBLY - Cockpit		
			* FRAME ASSEMBLY - Baggage compartment door		
			* * HINGE ASSEMBLY - Baggage door		
			* * CLIP - Baggage door spring		

This listing is interpreted as follows:

If the DOOR ASSEMBLY (not indented) is ordered, it will include the three items listed under that item

If the FRAME ASSEMBLY (indented one space) is ordered, it will include the two items listed under the sub-assembly

If you want only a HINGE ASSEMBLY or CLIP, you order only that item

3 The "ATTACHING PARTS" such as nuts, bolts, screws, etc , that are available as commercial hardware items, are not generally supplied by the Piper Aircraft Corporation The catalog lists, for your convenience, those attaching parts required for main assemblies and installations The identifying number for these parts appears after the part name

4 All items of Optional Equipment are contained in the parts list in their proper sequence and sections These items were not marked optional, since they are fully identified by their descriptions

HOW TO IDENTIFY A PART IF YOU KNOW WHAT IT LOOKS LIKE AND KNOW WHERE IT IS LOCATED

1 Refer to Figure 1 to determine the section number in which the part is used

2 Refer to the Table of Contents and locate the section Note the figure numbers that illustrate the various subgroups of this main section

a Select the Figure title you think might contain the part you wish to identify and proceed to the grid (page) specified

3 NOTE: If you don't find the part on this illustration, try another figure in this group

4 Refer to the "Figure and Index Number" in the Parts Listing for complete description of the part

A - Secure from Lycoming, Division-Avco Corporation, Williamsport, Penna.
B - See Figure 84 for component parts
C - Used if engine hour meter is installed.
D - See Figure 122 if Radar System is installed.
E - If less than four mounts are being replaced, ascertain number which is stamped on rubber part of mount and order either 475 131 (J-3804-31) or 470 644 (J-3804-40). If four mounts are being replaced, it is suggested that four of part number 470 644 (J-3804-40) be ordered.
F - See Figure 103 for component parts if a Chrysler Alternator is installed. See Figure 42 if a Prestolite alternator, with air conditioning, is installed.
G - Reference latest revision to Piper Service Letter 837. The elbow assembly connecting the air filter to the fuel injector servo may become loose.
H - Reference latest revision to Piper Service Letter 718 pertaining to rework or replacement of the distributor block to accommodate two washers that are installed to improve the lubrication characteristics of the magneto. All Lycoming engines with Bendix S-1200 series magnetos shipped after Feb. 1, 1974, have already been modified and can be identified by the code letter on the magneto nameplate. Also reference latest revision to Piper Service Letter 682, which requires inspection of the piston pin on numerous engine models and reference latest revision to Piper Service Letter 665, which calls for installation of a new intake valve that incorporates a rotator cap.
J - Reference latest revision to Piper Service Bulletin 1134, applicable to PA-32-300 with serial numbers 32-15, 32-21, 32-40000 through 32-40974, 32-714001 through 32-7940290. A number of fuel injection servos have been found to seep fuel from the metered fuel pressure port, due to scoring caused by a damaged test fitting.
K - Reference latest revision to Piper Service Bulletin 1022, applicable to PA-32-300 with serial numbers 32-7640001 to 32-7940290. Induction air filters, Part No. 460 632, may exhibit a condition where the plastisol (black plastic ends) show signs of deterioration, exhibiting cracking, splitting and crumbling.
